Lipshultz L.I.

Infertility in the Male 4/e

ril. 9780521872898 Lst 130 pagg. 800;

Cambridge U.P. (30/09/2009)

Ginecologia / Gynaecology

The new edition of this canonical text on male reproductive medicine will cement the book's market-leading position. Practitioners across many specialties - including urologists, gynecologists, reproductive endocrinologists, medical endocrinologists and many in internal medicine and family practice - will see men with suboptimal fertility and reproductive problems. The book provides an excellent source of timely, well-considered information for those training in this young and rapidly evolving field. While several recent books provide targeted 'cookbooks' for those in a male reproductive laboratory, or quick reference for practising generalists, the modern, comprehensive reference providing both a background for male reproductive medicine as well as clinical practice information based on that foundation has been lacking until now. The book has been extensively revised with a particular focus on modern molecular medicine. Appropriate therapeutic interventions are highlighted throughout

Immunologia / Immunology

Little M.

Recombinant Antibodies for Immunotherapy

ril. 9780521887328 Lst 80 pagg. 440;

Cambridge U.P. (01/09/2009)

Immunologia / Immunology

Recombinant Antibodies for Immunotherapy provides a comprehensive overview of the field of monoclonal antibodies (mAbs), a market that has grown tremendously in recent years. Twenty-five articles by experienced and innovative authors cover the isolation of specific human mAbs, humanization, immunogenicity, technologies for improving efficacy, 'arming' mAbs, novel alternative Ab constructs, increasing half-lives, alternative concepts employing non-immunoglobulin scaffolds, novel therapeutic approaches, a market analysis of therapeutic mAbs, and future developments in the field

Medicina Legale / Forensic Medicine

Koehler S.A.
Forensic Epidemiology
Series: International Forensic Science and Investigation
ril. 9781420063271 Lst 82 pagg. 320;
CRC Press (01/09/2009)
Medicina Legale / Forensic Medicine

Forensic epidemiology provides an investigative response to public health issues and events that may be linked to criminal activities. After the events of 9/11, the field emerged as a leading tool of investigation, partnering public health officers with law enforcement like never before. This book demonstrates the important role of forensic epidemiology in public health, the medical community, and the legal system. Emphasizing the importance of understanding the terminology and procedures of each field in order to work together effectively, the text explains methods to collect, analyze, and interpret data for criminal investigations using a variety of illustrations and real-world case studies

Microbiologia / Microbiology

Mahy B.
DESK ENCYCLOPEDIA OF GENERAL VIROLOGY
ril. 9780123751461 Lst 60,99 pagg. 600;
Academic Press (15/09/2009)
Microbiologia / Microbiology

This volume, derived from "Encyclopedia of Virology", provides an overview of the development of virology during the last ten years. Entries detail the nature, origin, phylogeny and evolution of viruses. It then moves into a summary of our understanding of the structure and assembly of virus particles and describes how this knowledge was obtained. Genetic material of viruses and the different mechanisms used by viruses to infect and replicate in their host cells are highlighted. The volume is rounded out with an overview of some major groups of viruses with particular attention being given to our current knowledge of their molecular biology. This is the most comprehensive single-volume source providing an overview of virology to non-specialists. It bridges the gap between basic undergraduate texts and specialized reviews. It offers concise and general overviews of important topics within the field that will help when preparing for lectures, writing reports, or drafting grant applications

Mahy B.W.J.
Desk Encyclopedia of Human and Medical Virology
ril. 9780123751478 Lst 60,99 pagg. 600;
Academic Press (15/09/2009)
Microbiologia / Microbiology

This volume contains 82 chapters that provide detail and understanding to the fields of human and medical virology. The first section describes general features of common human viruses with specialized chapters related to HIV/AIDS. The volume goes on to describe exotic virus infections, including one now eradicated virus (smallpox) and some now controlled by vaccination such as yellow fever. Concepts of medical virology are further developed with entries on viruses associated with oncogenesis and selections of interest to medical virology. This is the most comprehensive single-volume source providing an overview of virology to non-specialists. It bridges the gap between basic undergraduate texts and specialized reviews. It offers concise and general overviews of important topics within the field that will help when preparing for lectures, writing reports, or drafting grant applications

Neurologia / Neurology

Hogervorst E.

Hormones, Cognition and Dementia: State of the Art and Emergent Therapeutic Strategies

ril. 9780521899376 Lst 65 pagg. 304;

Cambridge U.P. (30/09/2009)

Neurologia / Neurology

A decade ago, oestrogen-containing hormone therapy was viewed as a promising strategy for the prevention and treatment of dementia and age-related cognitive decline. However, treatment trials in women with Alzheimer's disease showed that oestrogens did not reverse cognitive impairment, and clinical trials in healthy older women indicated that oestrogens did not prevent cognitive decline. The Women's Health Initiative Memory Study trial even suggested an increased risk of dementia with treatment late in life. What happened? How are we to understand these findings? What are the implications for middle-aged and older women? What about testosterone, and what about men? And where do we go from here? This book brings together world-renowned experts in basic and clinical research on sex steroids, aging, and cognition to integrate existing findings with emerging new data, and offer challenging hypotheses on these key issues.

Buxton R.

Introduction to Functional Magnetic Resonance Imaging: Principles and Techniques

ril. 9780521899956 Lst 110 pagg. 480; illustrazioni: 54;

Cambridge U.P. (30/09/2009)

Neurologia / Neurology

Functional Magnetic Resonance Imaging (fMRI) has become a standard tool for mapping the working brain's activation patterns, both in health and in disease. It is an interdisciplinary field and crosses the borders of neuroscience, psychology, psychiatry, radiology, mathematics, physics and engineering. Developments in techniques, procedures and our understanding of this field are expanding rapidly. In this second edition of Introduction to Functional Magnetic Resonance Imaging, Richard Buxton – a leading authority on fMRI – provides an invaluable guide to how fMRI works, from introducing the basic ideas and principles to the underlying physics and physiology. He covers the relationship between fMRI and other imaging techniques and includes a guide to the statistical analysis of fMRI data.

Kilpatrick T.

Inflammatory Diseases of the Central Nervous System

ril. 9780521888745 Lst 65 pagg. 296;

Cambridge U.P. (30/11/2009)

Neurologia / Neurology

Interactions between the immune and nervous systems are involved in many disease processes. Modulation of inflammation can provide an important opportunity to enhance regeneration within the central nervous system. This authoritative book defines the key cellular players in mounting an inflammatory response and highlights critical factors in the target organ that influence the nature of that response and its capacity either to damage or protect the brain. Several key clinical areas are highlighted - particularly autoimmune diseases of the nervous system including multiple sclerosis, as well as microbiological and traumatic challenges; the book therefore provides both a summary of the basic science background as well as practical, clinical-friendly guidelines to management. The book will be of interest to a wide range of physicians, including neurologists, neurosurgeons, neurorehabilitationists, infectious disease physicians, and clinical neuroscientists, as well as neuroscientists and immunologists

Carhuapoma R.

Intracerebral Hemorrhage

ril. 9780521873314 Lst 75 pagg. 288; illustrazioni: 67;

Cambridge U.P. (30/08/2009)

Neurologia / Neurology

Intracerebral hemorrhage is a neurovascular emergency associated with high mortality and morbidity. With in-depth reviews of the clinical and biological aspects of the condition, this text provides an up-to-date coverage of this form of stroke. The book covers epidemiology, causes, clinical presentation, management and prognosis, and describes the ongoing research advances aimed at improving our understanding of the condition. The book fills an existing gap in the medical literature. The chapters discussing the clinical aspects of intracerebral hemorrhage are aimed at the practitioner directing the care of stroke victims. Chapters exploring the biology of pathophysiological events triggered by this disease will provide readers with current data directed to facilitate experimental research in this field of cerebrovascular neurology. It will appeal to clinicians and those with a research interest in cerebrovascular diseases

Kew J.

Ion Channels From Structure to Function

ril. 9780199296750 Lst 95 pagg. 576;

Oxford U.P. (01/09/2009)

Neurologia / Neurology

Ion channels are intimately involved in the everyday physiological functions that enable us to live a full and varied life. When disease strikes, malfunction of ion channels or their dependent processes is often involved, either as the cause or effect of the illness. Thus, billions of dollars have been, and still are being, invested in research to understand the physiological and pathophysiological functions of ion channels in an attempt to develop novel therapeutic treatments for a wide range of diseases

Oftalmologia / Ophthalmology

Scott I.U.

Diabetes and Ocular Disease

ril. 9780195340235 Lst 55 pagg. 352;

Oxford U.P. (01/10/2009)

Oftalmologia / Ophthalmology

This volume is a useful guide for ophthalmologists in managing diabetic patients, as well as a resource for statistical data on diabetic retinopathy. The appendix reprints the abstracts of the major collaborative, multi-centre clinical trials for diabetic retinopathy

Oncologia / Oncology

Bruera E.D.

Cancer Pain: Assessment and Management

ril. 9780521879279 Lst 145 pagg. 660;

Cambridge U.P. (31/10/2009)

Oncologia / Oncology

Drs Eduardo D. Bruera and Russell K. Portenoy have completely revised and updated the widely respected Cancer Pain: Assessment and Management for the second edition of this unanimously praised book. This is a comprehensive, clinically oriented review of all aspects of the complex and multidimensional problem of cancer pain. The unique characteristics of cancer pain, including pathophysiology, clinical assessment, diagnosis, and pharmacological and nonpharmacological management are all discussed here in detail. Internationally recognized leaders in cancer pain research have contributed to many new chapters, including neuraxial analgesia, hospice and institution-based palliative care programs, bone pain, and cancer pain and palliative care in the developing world. Cancer Pain continues to be a scholarly but accessible text that is an essential resource for physicians, nurses, and medical students who treat suffering from cancer pain.

Ostetricia / Obstetrics

Warren R
Best Practice in Labour and Delivery
ril. 9780521720687 Lst 50 pagg. 376;
Cambridge U.P. (31/10/2009)
Ostetricia / Obstetrics

An understanding of when and how to intervene is the key to good obstetric care. This textbook is an encompassing reference covering all the essential information relating to childbirth; it offers clear practical guidance on all aspects of labour and delivery. Written by well-known leading experts, each chapter offers a modern authoritative review of best practice. The evidence base described will help to optimize outcome through appropriate clinical management and justifiable intervention. Whilst this is an ideal textbook for those training and taking examinations in labour ward practice, it offers all those caring for the woman in labour a modern, evidence-based approach which will help them understand, recognize and deliver the best possible clinical care

Pediatria / Pediatric

Hansmann G.
Neonatal Emergencies
br. 9780521701433 Lst 50 pagg. 520;
Cambridge U.P. (31/10/2009)
Pediatria / Pediatric

Covering the management of critically ill newborns from the first minute of life through the first 72 hours, this practical, evidence-based and clinically-informed guide will provide all members of the pediatric care team with the essential information to save lives and prevent disability. With chapters on neonatal transport, resuscitation, ventilation and ethical issues, the content is further illustrated with case studies illustrating the real-world aspects of identifying critical signs and symptoms, diagnostics and treatment in multiple settings. As well as including numerous clear diagrams and summary tables, the text includes algorithms based on international guidelines to help navigate the reader through the delivery of care, and a comprehensive listing of drugs and dosages, serving as a quick reference guide when making treatment decisions.

Psichiatria / Psychiatry

Partonen T.
Seasonal Affective Disorder - Practice and Research 2/e
ril. 9780199544288 Lst 65 pagg. 368;
Oxford U.P. (01/09/2009)
Psichiatria / Psychiatry

Seasonal affective disorder (SAD), or winter depression, is a mood disorder related to the change in the seasons and lack of exposure to daylight. It affects 1 in 100 adults in western countries. SAD is a rare example of a psychiatric disorder with a clear, identifiable biological cause. The new edition of this award winning book brings together distinguished scientists and opinion leaders to discuss the current and anticipated developments in the study and care of Seasonal Affective Disorder. Highlighting the clinical diagnosis and management of Seasonal Affective Disorder (SAD), this book provides a valuable resource for all whom are involved in the health care for patients with SAD

Grant J.E.
Young Adult Mental Health
ril. 9780195332711 Lst 47 pagg. 464;
Oxford U.P. (10/09/2009)
Psichiatria / Psychiatry

The years between 18 and 29 have become an extended period of development between adolescence and middle adulthood; young adulthood is a time of many new personal, social, and cultural pressures. Risk-taking behaviors, including substance use, typically peak during this time period in part due to neurobiological development, identity exploration, and social interactions, and most major psychiatric disorders develop during young adulthood

Psicologia / Psychology

Lemke G.

Developmental Neurobiology

ril. 9780123750815 Lst 108 pagg. 770;

Academic Press (15/08/2009)

Psicologia / Psychology

Developmental Neuroscience is one of the six core disciplines in Neuroscience, and yet no single volume, non-textbook reference exists on the market that provides researchers with more in-depth, high-level information on developmental neurobiology. Currently, anyone interested in the field at a higher level must sift through review articles published frequently and the more specific handbooks that focus on aspects of development rather than the field as a whole

Radiologia / Radiology

Schäfer A.O.

MRI of Rectal Cancer - Clinical Atlas

ril. 9783540728320 139,95 pagg. 250; illustrazioni: 500;

Springer Verlag (30/09/2009)

Radiologia / Radiology

Today magnetic resonance imaging (MRI) of rectal cancer is one of the most interesting topics in radiology. Over the last decade technical refinements have strengthened the role of MRI as a first-line diagnostic strategy for accurate staging of rectal cancer. MRI is perfectly suited to predict tumor-free circumferential resection margins. Additionally, high accuracies have been reported for the T and N stages, which is comparable to transrectal ultrasound (TRUS). Novel approaches to moving table MRI serve as a platform for thoracic, abdominal and pelvic staging of rectal cancer patients within one examination

Rianimazione / Emergency

Koenig K.

Koenig and Schultz's Disaster Medicine: Comprehensive Principles and Practices

ril. 9780521873673 Lst 120 pagg. 704; illustrazioni: 123;

Cambridge U.P. (30/11/2009)

Rianimazione / Emergency

As societies become more complex and interconnected, the global risk for catastrophic disasters is increasing. Demand for expertise to mitigate the human suffering and damage these events cause is also high. A new field of disaster medicine is emerging, offering innovative approaches to optimize disaster management. Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources. Now, for the first time, a coherent and comprehensive collection of scientific observations and evidence-based recommendations with expert contributors from around the globe is available in Koenig and Schultz's Disaster Medicine: Comprehensive Principles and Practices. This definitive work on disaster medicine identifies essential subject matter, clarifies nomenclature, and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises. It also describes in-depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical, biological, and radiological agents

Veterinaria / Veterinary

Mahy B.W.J.

Desk Encyclopedia Animal and Bacterial Virology

ril. 9780123751447 Lst 60,99 pagg. 600;

Academic Press (15/09/2009)

Veterinaria / Veterinary

This volume contains 81 chapters that relate to veterinary and bacterial virology. The first section describes general features of farm and other animals of agricultural importance. The following three sections detail other animal viruses, avian viruses, and viruses affecting aquatic species such as fish and crustaceans. The Section five deals with viruses which infect bacteria. This is the most comprehensive single-volume source providing an overview of virology issues related to animal and bacteria. It bridges the gap between basic undergraduate texts and specialized reviews. It features concise and general overviews of important topics within the field that will help in preparation of lectures, writing reports, or drafting grant applications
